★ **Skirt Length:** (in inches)

(For Skirt length: Measure the **FLAP ONLY** that hangs **BELOW** the cover)

★ **Tie Downs:** 2 4 None

(Total number of Tie Downs, **NORMALLY** there are 4)

Foam Type: Standard Durofoam®

(Standard Foam has an R Value of 14, Durofoam has an R Value of 21, if no selection is made we will manufacturer in Standard Foam)

Manufacturer/Model: _____

(If known)

Tips: #1 Always measure in inches. **#2** Always measure to the widest part of your spa. **#3** If your old covers fits well measure that.

Special Notes:

Measuring a Radius Corner

The dash line represents what you need to measure!

Place a carpenter's square up against the corner and read the inside measurement where it touches the cover. For corners only **ALWAYS ROUND DOWN** to the next **LOWEST** inch! **NEVER ROUND UP!**

We have an easy radius sheet available on our website. You can place the easy radius sheet up to your spa and it will tell you the measurement.

Must circle Radius above on Radius Corners line.

Size of radius in Inches

Agreement between Dealer and Spa owner

Cover specifications above were provided by Spa Owner. Owner assumes all responsibility for cover specifications. All information pertaining to order must be noted on order form. Separate conversations cannot be taken into consideration. Tie down location is not guaranteed but we will provide all new hardware for mounting. Due to foam taper and hinge width covers may appear about an inch larger when measuring from handle to handle, this is normal. Any cancellation or changes must be made within 1 hours or placing order as everything is custom.
